Datasheet
Ball segment valve
KVTW-D/KVXW-D

Si-114 EN

Edition: 2022-11

- Control and shut-off valve
- High capacity
- One-piece shaft gives torque transmission free of backlash
- Excellent tightness irrespective of differential pressure
- Easy maintenance

Option

- Ball segment with V-port for high mass concentrations
- Ball segment with Low Noise Trim, sound-dampening insert for high ΔP

Type KVTW-D/KVXW-D:	**Wafer design Short face to face**	
Nominal pressure:	**PN 10/16/25/40, Class 150/300**	**PN 10/16/25, Class 150**
Nominal size:	**DN 25/15 - 65**	**DN 80 - 250**
	NPS 1 - 2 1/2	**NPS 3 - 10**

Product Information

The Somas ball segment valve type KVTW with a centrically mounted shaft, and KVXW with an eccentrically mounted shaft are of wafer design. The valve called the D-version is manufactured in short face to face dimensions common in certain markets.

The valve is also manufactured in A-type version with a standard face to face dimension (See Si-113).

The valve body is in one piece. Somas unique shaft device is designed for torque transmission and gives backlash-free operation with accurate control. The spring-loaded seat is available in three alternative materials (PTFE, PTFE 53 and HiCo [High Cobalt Alloy]).

The valves can be used for control, as well as for shut-off applications on practically every type of media within a wide temperature range.

Choose KVTW for liquids, media containing impurities etc. For dry and clean media choose KVXW. In the KVXW-valve the ball segment is eccentrically mounted and rotates out from the seat when the valve is opened. This reduces the wear on seat and segment.

Low noise trim is available as an option on DN50 to DN250. The designation “LN” indicates that the ball segment is equipped with a network of bars that are used to split up the pressure drop across the valve. This results in less pressure recovery, thereby reducing the noise and potential damage due to cavitation.

Note! Capacity factors will be reduced for valves with LN-trim.

Ball segment DN50 to DN250 with V-port is available for use at high fiber concentrations. The V-port design prevents dewatering at small opening angles.

The Somas valves are delivered ready for installation and operation. The valve assemblies are delivered factory tested as complete units with actuators, positioners and accessories.

Option

Within the process industry and the energy sector there are a number of applications where process data in combination with standard control valves will end up with problems such as high noise level and erosion. These issues are mostly related to cavitations and high flow velocities inside the valve.

Note! By using a standard ball segment valve and add a noise reduction trim many of the above mentioned issues can be solved.

See data sheet Si-108 for more theoretical information.

For controlling suspensions with high fiber concentrations it can be advantageous to use valves with a V-port to reduce the risk of de-watering at small opening angles.

Capacity factors and remaining factors for valves with LN-trim and valves with V-port are available in the valve sizing program SOMSIZE.

Ball segment with V-port for high mass concentrations

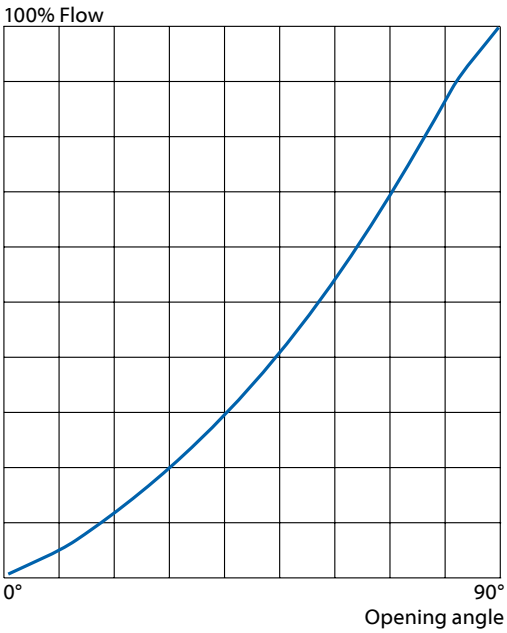

Ball Segment with Low Noise trim

Tightness class

The tightness class is related to the chosen material in the seat ring.

Standard leakage class	Optional leakage class
EN 60534-4	**EN 60534-4**
PTFE - Class V	PTFE - Class VI
PTFE 53/PEEK - Class V	HiCo - Class V
HiCo - Class IV-S1	
	EN 12266-1
	PTFE - Rate C
	PTFE - Rate D
	PTFE 53/PEEK - Rate D
	HiCo - Rate E
	HiCo - Rate F

150	25	250	185	370	A23-DA	A22-DA		A24-SC/SOL	A24-SC/SOL	
200	30	400	295	640	A24-DA	A23-DA	No HiCo	A33-SC/SOL	A24-SC/SOL	No HiCo
250	35	600	449	1000	A32-DA	A31-DA	No HiCo	A33-SC/SOL	A33-SC/SOL	

No HiCo =”No HiCo seats” Valves with HiCo seats should not use PN10 actuators. PTFE/PTFE53 is OK
SC/SCL = Spring to close at air failure
SO/SOL = Spring to open at air failure

Flange standard

Somas ball segment valves type KVTW DN25/2–250 and KVXW with nominal size DN25–250 are flangeless and should be clamped between flanges.

When ordering, please always state the pressure rating of the counter flanges. See the valve specification system code 13.

Ordering

State desired valve according to the valve specification system below as well as type of actuator, positioner and accessories.

Valve sizing

Use Somas valve sizing program SOMSIZE to find the correct valve size. All sizing factors are included in the program.

Face to face dimension

According to Industrial branch standards, both standard face to face and short face to face dimension.

Further technical information

Technical data for the materials used in the Somas valves, flange standard, steam data, etc. can be found in documents library on www.somas.se.

Actuators and accessories

The valves can be fitted with Somas manual, on/off or control actuators in accordance with the selection table. The valves will then be delivered as tested units ready for installation.

In the documents library on www.somas.se there is also information about positioners, limit switches and solenoid valves.

We can also fit other types of actuators and accessories in accordance with your specification.

Valve specification system

KVTW - D 5 - A J A - B 1 1 - DN... - D... - B... - PN...
1 2 3 4 5 6 7 8 9 10 11 12 13

1 Type of valve
KVTW (centrically mounted segment)
KVXW[2] (excentrically mounted segment)
KVTW LN[1] (centrically mounted segment, Low Noise)
KVXW LN[1] (excentrically mounted segment, Low Noise)
KVMW (ball segment with V-port)

2 Valve body design
D = Wafer style design according to branch standard. Short face to face length

3 Nominal pressure
5 = PN25
6 = PN40/Class 300

4 Material – valve body
A = CF8M/1.4408
E = CK-3MCuN
H = 1.4470
S = Titan Gr C-2

5 Material – segment
H = 1.4462 alt. 1.4470
J = 1.4460 alt. SS2324-12
K = 1.4460 alt. SS2324-12, hard chromed
L = 1.4460 alt. SS2324-12, HiCo Gr 21 coated
U = Titan Gr C-2 / Gr 2
Y = 1.4462 alt. 1.4470, hard chromed

6 Material – seat
A = PTFE (10 % carbon, percentage by weight)
B = PTFE 53 (50 % PTFE + 50 % 1.4435 powder) (percentage by weight)
T = HiCo Gr 6 alt. 1.4404, HiCo Gr 6 alt. Gr 21 coated

7 Material – shaft
A = 1.4460 / SS 2324-12
B = 1.4460 / SS 2324-12 (Hard chromed)
T = Titan Gr 2 alt. Gr C-3 alt. Gr 3
Y = 1.4462 alt. 1.4470 (Hard chromed)
Z = 1.4462 alt. 1.4470

8 Bearings – valve body/shaft
1 = Without bearing
4 = Rulon
6 = N06625 (High Nickel Alloy)
7 = 1.4409
8= 316L PTFE coated

9 Stuffing box
1 = Graphite
2 = PTFE

10 Valve size, DN

11 Shaft diameter

12 Actuator mounting flange drilling

13 Drilling, counter flanges, PN/Class

1) From DN 50
2) From DN 25
