It's all about making the complex simple

Your process performance and reliability are important for us. The selection of valves and accessories affects business performance, efficiency, reliability, and continuity. With more than 75 years within the business we have an extensive industry experience and knowledge. Our dedicated personnel and our services are there to support you.

The work of our design and development departments enables us to provide products with low service and maintenance costs.

Modern machinery ensures accuracy and efficiency.

Service and training – an important part of Somas quality concept.

"Good products build confidence, good service builds trust"

Peter Hägg, CEO Somas

Product development

The product development is driven by our ambition to offer you products that are reliable and easy to service. Nothing is left to chance in our choice of materials, technical solutions, and accessories for the most demanding environments and processes.

Manufacturing and quality

Our products can cope with the most demanding environments and applications. We use various grades stainless steel as well as high nickel alloys and titanium. To self-guard quality and reliable delivery our products are machined and assembled in our own workshop. We are using the latest machine tools combines with a high degree of automation. All valves and accessories are subject to thorough quality checks. Every unit is performance tested and pressure tested before delivery.

Sustainability

Somas sells and develops products that help decrease the impact our customers have on the environment. Our products are designed for different applications within different business areas, where our sustainable solutions make a positive contribution. Our ambition is to continuously improve to make sure we act responsibly during the entire process. We think the key is to meet the demands and needs of today without compromising the ability of the next generation to do the same.

SomAware®

Somas has developed several tools that make your work easier. SomAware® gives you access to our digital capability. We offer products, systems, solutions, services and a platform that allows you to know more, do more and increase your valves' performance. The platform will be continuously developed with customer's process and business in mind. What would your valve say if it could talk? We have the answer! The question is, are you ready to listen?

Certificates and Approvals

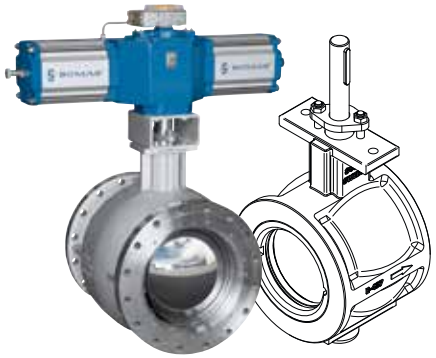

Somas is certified in accordance with:

- ISO 9001:2015
- ISO 14001:2015
- ISO 45001:2018
- PED 2014/68/EU - Our quality system is approved according to the requirements in module H.

Edition: 2023-02

Products

Ball segment valves, type KVT / KVTW / KVTF (KVX / KVXW / KVXF)

Sizes: DN 25/2-250 (wafer design)
DN 25/2-600 (flanged design)

Pressure rating:		
	DN 80-500	PN 25 / Class 150
	DN 25/2-250	PN 50 / Class 300
	DN 600	PN 16

For more information see data sheet Si-101EN, Si-108EN Si-110EN, Si-111EN, Si-112EN, Si-113EN and Si-114EN.

Metal seated butterfly valves, type VSS / MTV

Sizes: DN 80-500 (MTV)
DN 80-1200 (VSS)

Pressure rating: PN 25 (Class 150) (MTV)
PN 25-50 (Class 150 and Class 300) (VSS)

For more information see data sheet Si-203EN, Si-204EN, Si-205EN, Si-206EN, Si-208EN, Si-209EN and Si-211EN.

Ball valve, type SKV/SKVT

Sizes: DN 25-400 (flanged floating ball)
DN 450-500 (flanged trunnion)

Pressure rating:		
	DN 25-50	PN 40 / Class 300 (floating ball)
	DN 80-400	PN 25 / Class 150 (floating ball)
	DN 450-500	PN 25 / Class 150 (trunnion)

For more information see data sheet Si-706 EN.

Pneumatic actuator, type A

Double acting and single acting.

Option: Locking Device Closed position (LDC).

Torque range: up to 19925 Nm

For more information see data sheet Si-503EN and Si-522EN.

Gear Unit

Option: Lockable design, chain wheel.

For more information see data sheet Si-502EN.

Accessories for actuators

Somas offers a wide range of technology from pneumatic to advanced digital valve positioners from various suppliers. For on-off applications we also offer a wide range of accessories from analogue to digital with various communications protocols.
